Description

Financial Accounting Tutor 98 is a self-paced, interactive tutorial. It covers all the topics you'd encounter in a typical financial accounting course. Accountants' logic is explained from an economics perspective, and accounting procedures are explained from an information systems perspective. This helps students understand the logic of accounting concepts and procedures. In this update, all known bugs have been fixed, the Financial Assistant has been updated, and a searchable index and glossary have been added. Only 5 out of 29 chapters are enabled in the trial version.
