Version: 3.0

Downloads: 7,595

Requirements: Windows 95, 98, or NT

Purchase Information: Shareware: Free to try, \$30.95 if you decide to keep it.

Financial Accounting Tutor is a self-paced manual that introduces the basics of accounting in a clear, well-organized etext format. It's a great starting point for those interested in accounting and bookkeeping principles. Take a look at the first four chapters then register to get all 32. The etext covers introductory and intermediate accounting in an easy-to-understand interactive format, with plenty of examples and graphics. Search the text, add your own notes, bookmark pages, and pop up the calculator to work through the examples at any time. The FACT Assistant provides basic tools for calculating depreciation, cash flows, bond prices, interest rates, and more. The etext can be studied independently or as a classroom text. Slides and instructor materials are promised in the near future. *Reviewed on Sep 05 2000.*
